

## LOCKDOWN AND CULTURE

How original am I ? One more lockdown article ! But don't worry, here we are talking about how it affected the culture. More than two months at home made us reconsider our interest center. Indeed, we weren't able to live the same life as before ! You had to forget sports, theatre, concerts... So as we may not go to it, it came to us ! I hope like me you've watched the huge concert organized by Lady Gaga, called « One World Together At Home ». The 500 minutes of concerts, hosted by Jimmy Fallon et Jimmy Kimmel ( Americans tv presenter) was available in 50 countries, and more than 70 artists participated ! This event also raised 128 millions dollars of donations, to fight against Covid-19 and help nursing staff. So i think that we can all agree and say thank you Lady Gaga ! Who as many singers saw her worldwide concerts tour canceled or reported.

But that's the only activity that we did during the quarantine ! We also learn new things like DIY, cooking, re-organization of home and sommant other possibilities. But if you were lazy as I am, you've binge watched streaming platforms. I think that I've finished all my Netflix list ! No just kidding, I had lot of work with school. Statistics also proved that people started to read more and more ! While we all thought that this market was passing away, the books sales have never been so high since many time. I personally think that this lockdown allowed us to reconnect with simples things, take time to enjoy activities that we don't usually appreciates, and in that way, we may consider that it was like some vacations !
